

Organisation: SweetCrumb Bakery

Student Name: Thikolweli

Student Number: ST10498479

Introduction

This document serves as the official website project proposal for SweetCrumb Bakery, a small business specialising in cakes and biscuits. The purpose of this proposal is to outline the goals, structure, design, technical requirements, and timeline for developing a five-page website for the organisation. This proposal will guide the development process and provide a clear plan for creating an effective online presence for SweetCrumb Bakery .

Organisation Name: SweetCrumb Bakery

SweetCrumb Bakery was founded in 2025 as a home-based bakery by master baker Michael mukwevho..It began as baking birthday cakes for friends and quickly grew into a full time passion.Due to popular demand, the business opened a retail shop that same year

The mission is To bring joy through freshly baked, high-quality cakes and biscuits using traditional recipes and local ingredients.

The vision is To become the most loved local bakery known for custom celebration cakes and biscuits.

The target audience includes Families ordering birthday cakes, working professionals looking for coffee and biscuits, event planners needing wedding or corporate cakes, and gift shoppers.

Specific Goals

The Goal Description is to Increase cake orders and Create an easy online enquiry system for custom cake orders.

Showcase products Display a gallery of cakes and biscuits with clear descriptions.

Build brand trust Share the bakery's story, mission, and team members.To Generate customer leads Collect enquiries through a contact form

Key Performance Indicators (KPIs)

KPI Target

Website visits per month 500+

Enquiry form submissions 20+ per month

Time spent on website 2+ minutes on average

Contact page visits 100+ per month

Current Website Analysis

SweetCrumb Bakery does not currently have an existing website. This project involves building a brand new website from scratch. There is no existing website to analyse, so all features will be new implementations based on best practices for small business bakery websites.

Proposed Website Features and Functionality The

website will consist of five main pages:

Page Filename Features

Home index.html Hero image, welcome message, call-to-action buttons, navigation menu

About Us about.html Organisation history, mission statement, vision statement, team member profiles

Products products.html Gallery of cakes and biscuits with descriptions and prices

Enquiry enquiry.html Form for custom cake or biscuit orders (name, email, phone, product type, event date, message)

Contact contact.html Two location addresses, phone numbers, operating hours, email address

Design and User Experience

Colour Scheme

Colour Hex Code Usage

Warm cream #FDF6E3 Background colour

Soft brown #D4A373 Header, footer, cards

Terracotta accent #CC7B4E Buttons, headings, links

Typography

Element Font Style

Headings Playfair Display Serif, elegant

Body text Poppins Sans-serif, clean, readable

Layout and Design Approach

The website will use a clean, responsive layout that works on desktop, tablet, and mobile devices. Key design features include:

- Sticky navigation menu for easy access to all pages
- Card-based product gallery for visual appeal
- Large hero image on the homepage to create a warm, inviting feel
- Clear call-to-action buttons throughout
- Footer with copyright and quick links

User Experience Considerations

- Simple navigation – users can reach any page within three clicks
- Mobile-friendly design
- Fast loading times
- Clear contact information on every page via footer links
- Form validation to prevent incomplete submissions

Low-Fidelity Wireframe Description Homepage

layout:

- Top: Logo and navigation links (Home, About, Products, Enquiry, Contact)

- Middle: Full-width hero image with text "Freshly Baked Daily" and two buttons (View Products, Make Enquiry)
- Below hero: Welcome message and four feature cards (Custom Birthday Cakes, Wedding Cakes, Artisan Biscuits, Gluten-Free Options)

Bottom: Footer with copyright and quick links Inner
pages layout:

- Same header and footer as homepage
- Page title and subtitle at top
- Content area specific to each page
- Consistent spacing and alignment throughout

Technical Requirements

Requirement Specification

Hosting GitHub Pages (free hosting)

Domain name Not required for this assignment (local development and GitHub only)

Programming languages HTML5 for structure, CSS3 for styling

Frameworks None – pure HTML and CSS for simplicity and standards compliance

Development tools Visual Studio Code, Git, GitHub

Browser support Chrome, Firefox, Safari, Edge (cross-browser compatible)

Timeline and Milestones

Milestone Task Due Date Status

- 1 Organisation selection and approval Week 1 Complete
- 2 Project Proposal submission Week 2 Pending
- 3 Content research and sourcing Week 2 Pending

- 4 Create all HTML files (5 pages) Week 3 Pending
- 5 Implement navigation system Week 3 Pending
- 6 Set up GitHub repository Week 3 Pending
- 7 Write README.md with sitemap and changelog Week 3 Pending
- 8 Final testing and submission Week 4 Pending
